Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2142

1. Claims 1-27 are presented for examination.
2. Claims 18-25 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are indefinite because of the following :

- i) Claims 18-25 are rejected under 35 U.S.C. 112, second paragraph, as being vague and indefinite because claim 18 recites computer readable medium operable to provide instructions but it is not clear how instructions not embedded into the memory can be provided.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Song et al.

5. Song et al (6,347,336) taught the invention substantially as claimed (e.g., in exemplary claim 1) including an apparatus and method for automatic discovery of

Art Unit: 2142

network elements to generate a topology map of a portion of an optical network, (e.g., see, col 2, line 50 et seq), the method comprising:

- a) identifying NEs (col 4, line 25 et seq);
- b) organizing data retrieved from each identified NEs into a map which corresponds to the physical layout of the network, i.e., into a topology map (see col 2 line 51 et seq; col 2, line 1 et seq; and col 4, line 25 et seq.)

6. It would have been obvious to one of ordinary skill in the networking art at the time of the invention that the claimed invention differed from the teachings of Song et al only by a degree, e.g., claimed optical link language and statistical data. Song et al did not specifically state that their optical network comprised of optical links but this is inherent features of the fiber optic networks. Also, claimed statistical data is obvious variations of data collected by the discovery process in order to populate the topology database. Other claimed features are all obvious variations of the well known features of the optical networks and network management of optical networks.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mehmet Geckil whose telephone number is (703) 305-9676. The examiner can normally be reached on Monday through Friday from 6:30 A.M. to 3:00 P.M..
